INSTALLATION KIT

Beechcraft King Air and Beechcraft 1900 Windshields

Replacing a windshield for a King Air or 1900 airplane is easy and quick with an installation kit from PPG Aerospace.

PPG is the sole manufacturer of OEM windshields for these airplanes and a supplier of spares and rebuilt parts. With years of experience, PPG transparency experts have selected the materials for a quality replacement installation in an affordable kit.

The King Air and 1900 Windshield Installation Kit by PPG Aerospace comes ready to use. It includes four sponge rubber gaskets cut to size for precise fit and four rubber seal strips designed for securing the windshield in place to assure a superior seal when used with the sealant called out in the maintenance manual. Screws and bolts in various sizes provide a selection to complete the installation for any King Air or 1900 windshield design. An FAA 8130 tag is included for the aircraft maintenance record.

While similar kits are available, PPG's King Air and 1900 Windshield Installation Kit is attractively priced. And because PPG offers rebuilt windshields for direct sale to operators, the kit can be purchased conveniently at the same time as the rebuilt windshield and shipped together.

Part Number

King Air and 1900 Windshield Installation Kit 101-5041-3ANB

The King Air and 1900 Windshield Installation Kit is required for installation of the following windshields: 50-420069-37 and 50-420069-38; 101-384025-23 and 101-384025-24; and 114-384020-5 and 114-384020-6. It is designed for windshields used on these aircraft models: A90, B90, C90, C90A, E90, F90, 100, A100, B100 and F90A; 200, 200C, 200T, 200CT, B200, B200C, B200T, B200CT, 300, 300C, B300 and B300C; and 1900, 1900C, 1900D and C-12J.
