

We are excited to announce our NEW **CoolView** series window replacements.

CoolView replacements are FAA/PMA approved for existing windows, but with a tremendous **cabin comfort advantage.**

COOLVIEW WINDOW REPLACEMENTS

Why Cool View? Independent testing has proven this unique new window will block up to 62% of the IR (Infrared Ray) or heat coming through the windows. Resulting in a much cooler cabin. In addition, this CoolView window will block virtually all of the UV's (Ultraviolet Rays).

This process is internal, within the window construction. It is not an external coating that will wear off or ever need to be reapplied. Along with a much cooler cabin, CoolView will provide a safer environment for your health conscience pilots and passengers.

INDEPENDENT TESTING CONFIRMS:

- Cooler Cabin Temperatures
- Reduces IR (UP TO 62.8%)
- Reduces UV (UP TO 99%)
- Reduces Pilot Fatigue
- Preserves Aircraft Interior

LIGHT TRANSMITTANCE IR PROTECTION/REFLECTION
